## / EXPERIENCE

### >> Career Break

August 2022 to December 2022

Took a career break until December to dedicate myself to my graduation, extracurricular studies, English improvement, and volunteer work.

### >> Senior Software Engineer (Node.js/PostgreSQL/Python/React.js)

SparkAI | April 2022 to August 2022

Migrated the codebase to TypeScript, improved async bottlenecks resulting in better response times, and rearchitected the application to apply Clean Architecture concepts in legacy code.

Worked directly on projects with companies like John Deere.

Cubos Tecnologia | Jan. 2021 to April 2022

Tech Leader @ Nave à Vela

Made a huge database migration and code refactoring with +330 schools and 40K active users, so every action in the platform has an academic-year relation.

Tech Leader @ Residência de Software

Led three non-disposable MVPs. Ensured the technical quality of projects, defined the app's architecture, prioritized tasks, and mentored developers to align learning with practice.

### >> Freelancer Software Engineer

(Node.js/MongoDB/PostgreSQL/React.js/Python/React Native)

Mediato Tecnologia | Jan. 2021 to April 2022

### >> Mobile & Full-stack Software Engineer (Node.js/PostgreSQL/React.js/Kotlin)

Cubos Tecnologia | Aug. 2019 to Jan. 2021

@ZigPay, I implemented an internal MDM, making an 80% decrease in event setup time.

@ZakPay I integrated the "PDV" app to PagSeguro SDK to enable card payment within the app.

@DHL I integrated a barcode scanner library to track delivery packages in real time using Google Cloud PubSub.
