MATHEUS HOFSTEDE

/ ABOUT ME

I'm a Brazilian Senior Full-Stack Engineer with five years of experience.
Minimalist in material things, but not so much regarding knowledge.

Javascript/Typescript | Node.js | Python | Nest.js | Django | PostgreSQL | MongoDB | React.js | Next.js | Redux | Styled Components | Google Cloud Platform | AWS

/ WORK EXPERIENCE

>> Software Development Team Lead (Remote) (Node.js/Mongodb/React.js)
Red Acre Ltd | February 2023 to Present
I mainly work as a software engineer and team leader in the "CRM" product, a white-label crypto broker SaaS with integration to many trading platforms.
I've led the implementation of integrations with services and APIs like Sumsub, and have worked with the automation of many manual procedures, adding value to the product. Also, I'm one of the team leaders involved with the migration from a distributed monolith to a true event-driven microservices architecture.

>> Career Break
August 2022 to December 2022
Took a career break until December to dedicate myself to my graduation, extracurricular studies, English improvement, and volunteer work.

>> Senior Software Engineer (Node.js/PostgreSQL/Python/React.js)
SparkAI | April 2022 to August 2022
Migrated and improved async bottlenecks resulting in better response times, and rearchitected the application to apply Clean Arch. concepts in legacy code. Worked directly on projects with companies like John Deere.

>> Tech Leader (Node.js/PostgreSQL/React.js)
Cubos Tecnologia | Jan. 2021 to April 2022
@Nave à Vela, I made a huge database migration and code refactoring with +330 schools and 40K active users, so every action in the platform has an academic-year relation.

@Residência de Software, I led three MVPs, ensuring technical quality, scalable architecture, and mentoring to team members.

>> Freelancer Software Engineer
(Node.js/MongoDB/PostgreSQL/React.js/Python/React Native)
Jan. 2021 to April 2022
Managed and developed software for companies and provided DevOps services by creating automated CI/CD pipelines in GCP and AWS.

>> Mobile & Full-stack Software Engineer (Node.js/PostgreSQL/React.js/Kotlin)
Cubos Tecnologia | Aug. 2019 to Jan. 2021
I worked at startups/companies like ZigPay, ZakPay, and DHL, delivering app updates to thousands of users, and moving millions of Reais (R$).
Had experience in kick-starting projects, deciding on architecture and frameworks, and maintaining and refactoring existing code.

@ZigPay, I've implemented an internal MDM, making an 80% decrease in event setup time.
@ZakPay I've integrated the "PDV" app to PagSeguro SDK to enable a new set of card payments within the app.
@DHL I've integrated a barcode scanner library to track delivery packages in real time using Google Cloud PubSub.

>> Laravel Full-stack Developer (Volunteer) (Laravel/MySQL)
InfoJr UFBA | Nov. 2016 to Jan. 2019
Developed four projects in record time using the Laravel Framework, Bootstrap, MySQL Apache, and Docker.

/ EDUCATION

>> Universidade Federal da Bahia (Bachelor's Degree)
Sistemas de informações (Computing, Mathematics, and Administration)
Expected graduation in Summer 2023

Universidade Federal da Bahia is in the top 10 best universities in Brazil, evaluated with 5/5 by "Guia da Faculdade Estadão".

/ CERTIFICATIONS

>> Google Cloud Certified Professional Cloud Developer - 2023
>> Amazon Web Services Cloud Practitioner - 2023

/ HONORS

>> Tech Fellow (by Fundação Estudar) - 2021
I was one of 18 students approved to receive this merit-based scholarship among the 1800+ applicants.
